MuniLogic — Simply Empowering

Code · Permit · Property · License · Zoning · Customer

Water · Storm · Subdivision · Roadway · Sanitary · Tax

TRACK ALL ACTIVITY WITH IN ONE PLATFORM

ABOUT CODE ENFOREMENT MODULE

MuniLogic's Code Module is the all-in-one solution designed to streamline every aspect of your code enforcement lifecycle. It is a core component of the integrated MuniLogic suite, connecting your citizens, your office staff, and your field officers on a single, powerful platform.

- **From a Citizen Request:** A complaint logged in our Customer Module—whether by phone or submitted by a resident through the MuniCitizen online portal—can be turned into an official Code Case with a single click. All initial complaint details are carried over automatically.
- **Task Lists & Calendars:** Officers log in to see their full list of assigned code cases and inspections. They get turn-by-turn directions and a complete history of the property.
- **Comprehensive Case Files:** Maintain a complete history of every case. Log all photos, reports, contacts, and other documents directly within the case file for easy access and a better enforced code.
- **Personalized Dashboards:** Get a high-level, visual overview of your workload and priorities right from your "My MuniLogic" landing page, helping you monitor caseloads and make data-driven decisions.

Ready to Simplify Your Code Enforcement?
Let us show you how MuniLogic can empower your municipality.
